

5.3 Quality Policy

Focus Scientific is committed to a policy of providing services that will meet all our customers' expectations and requirements.

To this end, the Board has put into place a Quality Management System which meets the requirements of ISO 9001:2000. Registration to the standard will be applied for and achieved during 2008.

The quality management system is customer focused and strives to

- Meet the customer's requirements on time every time.
- Continually expand and improve the company's range of services and so increase the customer base.
- Continually monitor the Quality System to ensure its effectiveness in meeting the requirements of the customer and all interested parties.
- Achieve a reasonable profit allowing sustained growth and on-going investment in resources of the highest calibre.

Quality Objectives are established at the Annual Review in order to achieve the commitments of the quality policy. Their progress is reviewed at regular intervals. All management and staff have input into establishing and achieving the objectives thus ensuring a philosophy of continuous improvement throughout the organisation.

As the company grows this Quality Policy will be reviewed for continuing suitability.
